DETAILED ACTION

This action is in response to the Appeal Brief filed on July 28, 2006.

Claims 1-12 are allowed.

Reasons for Allowance

The following is an examiner's statement of reasons for allowance:

As pointed out by the Appellant in the argument section that the cited prior art (Alverson et al. [6,848,097] and Dunlap [6,615,368]) taken alone or in combination fail to teach, in combination with the other claimed limitations, retrieving an instruction, for which the breakpoint is to be inserted, from a corresponding instruction address in the main memory; inserting a breakpoint code at the instruction address in main memory; and after the breakpoint code is executed by a given one of the processors, storing the retrieved instruction in the corresponding instruction cache for that processor and setting a use-once indicator associated with the instruction as stored in the corresponding instruction cache for that processor, wherein the use-once indicator, when set for the instruction as stored in the instruction cache, is operative via cache control logic to clear a validity indicator associated with the instruction after a single fetch of the instruction from the instruction cache, such that subsequent attempts by the given processor to access the instruction as stored in the instruction cache will cause the processor to retrieve the breakpoint code at the instruction address in main memory as recited in the independent claims 1, 11 and 12.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue

fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
